

# TOOLS AND ATTACHMENTS

## FOR SKID STEER AND TRACK LOADERS

### Make Your Skid Steer & Track Loader More Productive

This brochure is designed to aid you in selecting tools to make your skid steer and track loader more productive. These tools represent a small portion of the construction attachments we offer. The right equipment at the right price can help the bottom line of any business.

#### COLD PLANERS

Standard flow and high flow models available for skid steer loaders. Available in 12", 16", 18", 24", 30", and 40" planing widths and 0" to 5" planing depth. Manual depth and tilt options available on standard flow.

- Planetary drive delivers high torque
- T1 steel construction in high wear areas
- Depth & tilt position indicators
- Standard general purpose picks
- Optional water tank/pump available

#### PARA-LEVEL LASER GRADERS

*"Replaces the traditional three person grading crew with a single operator"*

These Scrapers are usually sold with the optional laser grading system, as it allows the scrapers to finish grade elevations to within 1/4". The top of the line Para Level Scraper is the smoothest operating system, as the grading box adjusts independently from the skid steer and the floatation wheels. The double box on the Para-Level also allows grading in forward and reverse.

## GRADING BLADE

BY: **Level Best**

### *Grading Performance, Versatility, and Power for skid steers and compact tractor loaders!*

The Model GB108 Grader Blade lets you do even more with equipment you already have. Capable of cutting turf with the power and traction of a compact track loader, the GB108 can also be used with a skid steer for lighter applications. For about half the cost of a new pickup, now it's easier than ever to achieve grades to within 0.1" of spec for any application.

- Wide 108"/9 foot moldboard blade
- Hydraulic angle, tilt and offset with joystick controls from tractor
- Large, dual swivel wheels
- Allows you to grade within 0.1" of specification
- You can grade manually or with guidance system

## BACKHOES

For skid-steer loaders and compact tractors with a sub-frame mounting kits. The Bradco 509 Backhoe has a 9' 8" maximum digging depth with 12" to 38" bucket sizes available. Weight of the machine with a 12" bucket is 1425 lbs.

- 9' 7" Skid Steer or Tractor mounted
- 9' 8" Max Digging Depth
- 5676# Bucket Cylinder Digging Force
- 2754# Dipper Cylinder Digging Force
- Dual Cylinder Swing System
- Swing Speed Control
- Bucket Range 12" - 36"

## TRENCHERS

Make your tractor more versatile with our 3-pt. hitch, PTO driven trenchers designed to fit compact tractors with hydrostatic transmissions. These units feature digging widths of 3" to 12" and depths of 30" to 60" depending on the model. Built with heavy duty components, these trenchers will stand up to the most difficult soil conditions.

## HYD. BREAKERS

Strike Force Breakers have a smooth powerful operation for maximum energy and efficiency. Featuring 2 popular sizes - 500 or 750 ft./lbs. of impact energy, with only two moving parts. Available with 4 different tools. These breakers are easy to service and maintain.

## HYD. DIGGERS

The "X" Series is the most trouble free hydraulic digger on the market today. These diggers feature an "in-line" sealed planetary gear reduction drive design which ensures long, trouble free usage. All "X" Series models feature reverse rotation for quick backout when obstructions are encountered. The systems hydraulic relief valve protects the digger when an auger hits large immovable objects.

# TOOLS & ATTACHMENTS FOR SKID STEER AND TRACK LOADERS

## DOZER BLADES

Hydro-electric controlled angle and tilt, using only one loader valve. Tilt is 10 degrees off horizontal both directions and 30 degree angle right or left off center

- 84" or 96" widths available
- Standard skid shoe
- Universal skid steer loader quick attach mount
- Hydro-electric controlled angle & tilt
- Tilt indicator visible from operator's seat
- Optional electrical control box

## PALLET FORKS

For skid-steer loaders. Available with 36", 42", and 48" tines. Optional Auger Mount, Bale Spear and 2" Trailer Receiver Hitch available.

- HD frame designed to handle 4,000 to 6,000 lb capacities depending on tine option
- Heavy gauge brickguard offers outstanding strength and smooth surfaces for protection against load damage
- Excellent see through visibility allows the operator to see tine ends
- Exclusive load retention hook for securing and position pallet fork loads
- Optional personalized name or logo cut into frame
- Angled side corners and side step for easy and safe entrance in and out of loader

## ROTARY CUTTERS

These rugged built mowers are designed for shredding brush up to 4" diameter. The heavy 1/4" thick deck, with formed side plates, insures durability, even when working in the toughest of conditions. The mowers come with a number of unique features such as; optional sight gauge in deck to observe blade speed rotation and swing open maintenance door to the hydraulic motor. The mowers come completely assembled, including hoses and couplers. Just quick attach and plug in the hoses and you are ready to go to work.

Model:	GSS60	GSS72
Cutting Width:	60"	72"
Deck Height:	9"	9"
Overall Width:	64"	82.2"
Overall Length:	76"	76"
Minimum Cutting Height:	2.5"	2.5"
Skid Steer Hydraulic GPM:	15 - 20	15 - 25
Skid Steer Req'd Lift Cap:	1200#	1400#
Machine Weight:	1120#	1280#

## GROUND SHARK

Bradco's Ground Shark Extreme Duty 72" Brush Cutter incorporates a complete new design for increased production, maximum reliability, and ease of maintenance. This industry leading design incorporates a direct drive system for smoother and more quiet operation. Optional stump grinding carbide teeth increase mulching performance and allow stump removal from path. Heavy construction allows for lower center of gravity and better stability on hillsides. These brush cutters are ideal for roadside maintenance, fire control, right of way clearing, fence line maintenance, site preparation, and trail maintenance.

BC72GS	
Height (Overall)	28.13"
Width (Overall)	77.38"
Length (Overall)	85.59"
Cutting Capacity (Max. Tree Dia.)	7"
Max. Operating Pressure	4000 psi
Recommended Hydraulic Flow	30-45 gpm
Required Skid Steer Lift Capacity	2200 lbs.
Weight	2008 lbs.

## ROOT RAKES

Remove the toil and leave the soil at your job site with aggressive tine and grapple profiles that lock material in place and stabilize during transport. Weld-on D-Ring for numerous applications, replaceable pin-on H&L-230 style teeth for durability, serviceability, & extended life. 72", 78", and 84" widths available; 49" grapple opening. For skid-steer loaders.

Rake Width	Grapple Width	Overall Height	Grapple Opening	Tine Spacing	Wt.
72"	70"	38"	49"	9.5"	1095#
78"	70"	38"	49"	10"	1150#
84"	70"	38"	49"	8.5"	1220#

## SIFTING BUCKETS

The rake design is used for gathering material away from buildings and obstructions for faster clean up of debris, to level out clumps of dirt, and pick up pieces of sod, etc. Rake, pile, and load debris while sifting out soil that usually needs to stay in place. These unique buckets are available with three different mountings - standard tractor, skid steer and John Deere quick attach.

Optional Grapple

Width	Depth	Height	No. of Tines	Open Spacing	Wt.
66"	43"	22"	16	3 1/8"	550#
75"	43"	22"	18	3 1/8"	620#
84"	43"	22"	20	3 1/8"	690#

## 4 IN 1 BUCKETS

For compact tractors and skid-steer loaders  
60" & 72" for compact tractors  
66" & 72" Utility Grade for skid-steers  
72", 78" & 84" Construction Grade for skid-steers

- Utility, construction and compact tractor
- Functions as a loader's bucket, clam, grapple, dozer, box scraper and bottom dump bucket
- Strong hinges and pins to distribute load
- 100,000 yield light weight material construction allows more load capacity
- Optional bolt-on tooth bar available

## COMPACTION WHEELS

- Designed for skid steers, small excavators & backhoes
- Compactor widths of 12", 18", and 24"
- Rims available in 2, 3, and 4 wheels
- Wheel diameters of 22" and 28"
- Compactor weights of 320 to 980 lbs.
